

# 100-Year Floodplain in the Gold Line Corridor

- The 100-year floodplain depicts the worst-case flooding projected to occur once every 100 years.
- It is common for station parking lots or parts of the alignment to be in a floodplain.
- Six out of the seven stations have no floodplain issues.
- The Federal East station option has potential floodplain issues. The Federal West station option may not have floodplain issues, but additional analysis is being conducted to confirm.
