REMINDER OF PREVIOUS CONSTRUCTION NOTICE

Good morning,

This is a reminder that construction of a large underground drainage culvert between Zephyr Street and Carr Street along 13th Avenue will begin next week (week of 12/14/09) and will continue through spring 2010. Construction will take place mostly along the north side of 13th Avenue as a large ditch is excavated and the concrete culvert is installed below the future trackway. This culvert will cross to the south side of 13th Avenue just east of Zephyr.

Crews will begin working at 13th Avenue and Zephyr and will advance to the west in two block increments past Allison, Ammons, Balsam and Brentwood. When construction crews reach Carr Street, there will be a full closure of Carr Street at 13th while the culvert is built across Carr Street and into Richey Park. Advanced notice of the Carr Street closure will be provided to adjacent homeowners and through an additional e-mail notice as the closure draws near.

During the drainage culvert construction, 13th Avenue will be closed to both pedestrians and automobile traffic in the two block span where RTD is working at that time. Local access will be allowed.

Due to heavy equipment operations and earth moving, dust and noise are potential impacts. A water pump-around will be in place continuously for 24 hours throughout

construction but should have minimal noise impact.

For all other activities, work hours are scheduled 7:00 a.m. to 7:00 p.m. Monday through Friday and water trucks will be on site to minimize dust. If weekend or evening hours are required, adjacent residents will be notified. Construction workers will be parking their private vehicles in the RTD right-of-way during their work hours. The approved construction equipment routing is from Colfax to Carr to 13th Avenue and back again.

For your safety and that of our construction crews, please do not enter the construction zone.

For questions or additional construction information please contact Kathy Berumen, Denver Transit Construction group at 720-989.8099 or westcorridor@rtd-fastracks.com.

Thank you.
