Learn How to Ride Smart and Safe on RTD!
Ride Smart and Safe on RTD!

Name ________________________
At the station, stand behind the yellow safety line until the light rail train stops.
Stay in your seat while the light rail train is moving. If you have to stand, hold on tightly to the pole and stay away from the doors.
Light rail trains are very quiet so never run or play near light rail tracks or trains.
Before you cross light rail tracks, listen carefully and look both ways. If you see flashing lights or hear bells, that means a train is nearby. Once the bells and flashing lights stop, the gates go up and the light rail train has passed, it is safe to cross the tracks.
Find your way through the maze. Make sure to get off your bike, scooter or skateboard before you cross the tracks.
Wires over the light rail tracks have electricity for the trains and must never be touched. Keep everything away from the wires including your hands, your kites, and your toys.
It is very dangerous to throw anything at a bus, light rail train, or on the light rail tracks.
Stand away from the curb near the red RTD bus sign while waiting for the bus.
Stay seated while the bus is moving. If you have to stand, hold tightly to the pole and stay away from the doors.
If you need to cross the street after getting off the bus, wait until the bus drives away. Look both ways before crossing the street. It is dangerous to walk in front of an RTD bus.
Find and CIRCLE the Words in the PUZZLE!
